Cheers to the Earth

Caslay is on a mission to be a part of the solution to the global climate change crisis. We do this by adopting and developing sustainable practices in the apparel industry. With decades of experience in the apparel industry, we believe that fashion and sustainability can go hand in hand.

We strive to create products that are both stylish and eco-friendly. Our collection of recycled apparel is just the beginning of our commitment to reducing waste and promoting ethical practices in the fashion industry.

Running you through our Swag!

Know about US...

From Global Roots to Indian Soil

Caslay is not just a brand—it's a journey of purpose and innovation. With over eight years of global presence in sustainable apparel, Caslay has been trusted by international buyers for its ethical production and premium craftsmanship. Now, with a dedicated focus on the Indian market for the past two years, we bring the same global standards to corporate India. Whether you're a startup or an established enterprise, partnering with Caslay means aligning with a brand that understands quality, scale, and responsibility from a truly global perspective.

Certified Sustainable at Every Step

Sustainability isn't a marketing claim for us—it's a fully traceable process. Caslay proudly operates under globally recognized certifications including GOTS (Global Organic Textile Standard), GRS (Global Recycled Standard), OCS (Organic Content Standard), and RCS (Recycled Claim Standard). These certifications validate every step of our supply chain—from raw materials to final stitching—giving you complete confidence in the authenticity of your purchase. For corporates striving to meet ESG targets or demonstrate eco-conscious leadership, Caslay provides the perfect solution backed by real accountability.

Built on Consistency and Compliance

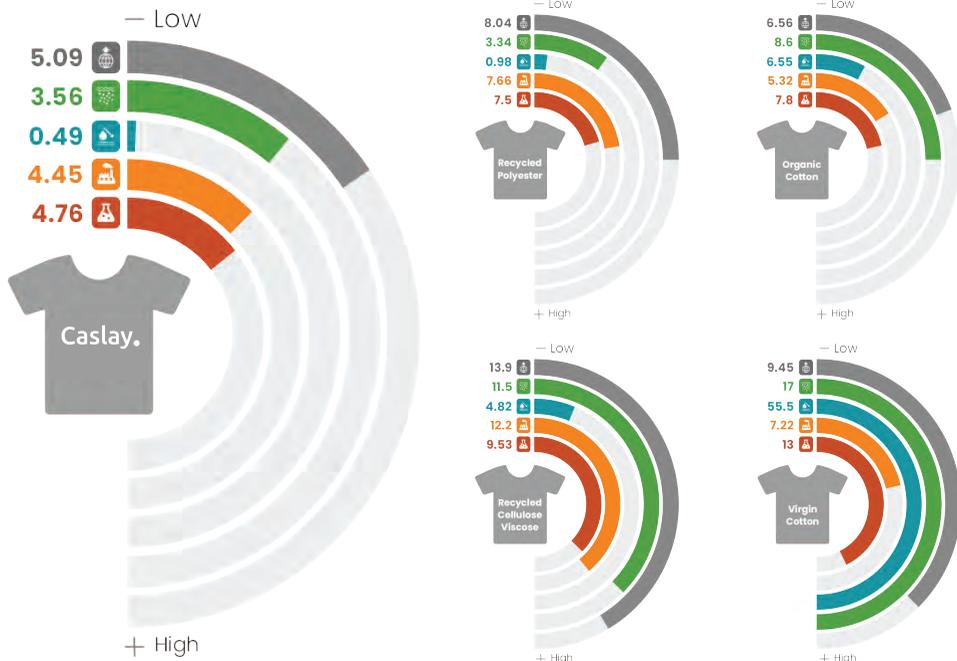

We understand that corporate procurement demands more than just product appeal—it requires assurance of consistency, reliability, and compliance. Our manufacturing units are Oeko-Tex certified, ensuring every garment is free from harmful substances and safe for human use. Our production systems follow strict quality benchmarks, enabling us to deliver on time, at scale, without ever compromising on standards. When you choose Caslay, you choose a supplier that's audit-ready and process-driven—built to match your expectations, every single time.

Premium. Sustainable. Unmatched.

In the realm of sustainable fashion, Caslay stands in a league of its own. Our garments offer a refined, luxurious feel that rivals the finest international labels—without compromising on ethics or the environment. No other brand in the market currently delivers this level of finish, comfort, and durability using eco-friendly practices. Whether it's for uniforms, client gifting, or team merchandise, Caslay ensures your brand is wrapped in sophistication while staying true to the planet. This is more than apparel—it's a bold statement of your values.

Let's Go!

Sustainable Material Impact Meter

We happily declare that the overall Higg impact score of 1 kilogram coloured knitted fabric is 18.36 for garments having recycled yarns, is among the lowest as compared to other textile materials listed on the Higg Index, as it doesn't need dyes or colorants. This score is specifically estimated for Yarns raw material and spinning process (rotor, 250 DTEX-225 denier-24/1 Ne-40 Nm) while keeping other parameters standard at Higg MSI product module.

Your Savings with Fabrics made from Recycled Yarns

* Based on impact parameters difference between 60% Recycled Cotton + 40% Recycled Polyester and 60% virgin cotton + 40% virgin polyester blends for 1 kilogram blends for 1 kilogram knitted fabric

Know where we stand

Among the benefits of the GRS certification is the verifiability of the certification.

Each certificate is assigned a unique QR code which can be scanned to download the certificate. This transparency sets it apart from other certifications.

Client Stories. Conscious Choices.

"We've tried several brands before, but nothing matches Caslay's finish in sustainable clothing. A game changer."

- TATA Group

"Caslay helped us align our teamwear with our sustainability values. The quality is premium, and the impact is real."

- Motherson

"Impressed by the finish and feel. You'd never guess these jackets are made from recycled materials. Truly premium!"

- KPMG

"We wanted something more meaningful for our festive gifting—and Caslay checked every box."

- GE

"We've tried several brands before, but nothing matches Caslay's finish in sustainable clothing. A game changer."

- Accenture

"Working with Caslay has made it easy to combine our ESG goals with day-to-day employee needs."

- Deloitte

Deloitte.

and many more...

Caslay Advantage

Caslay is committed to the advancement of sustainable fashion. With a state-of-the-art manufacturing facility of 3 lakh square feet spread over four locations, we are able to provide a consistent year-round supply.

Our supply chain extends from yarn making to finishing, with complete control over the processes which ensure quality control.

We have the capability to handle high performance fabrics (AATCC and ISO standards) with world-class machinery and processes. Our in-house design team helps keep designs and colours fresh, in line with market demands. We are certified in global standards such as GRS and OEKOTEX that affirm our commitment to provide high-quality sustainable products for the global market.

In addition, we go a step further with a 100% replacement guarantee.
